Young People's Club

Stage Amusing Play

Blizzard Affects Attendance

Will Give Play Again on May 18

Following the rainy weather of Saturday and a showery Sunday, old man winter refused to stay in his corner, and turned loose a nor'wester that might be expected of him in the latter part of January—certainly not for Easter Monday. With the mercury hanging around the plus ten mark on Sunday morning, the real snow early on Monday morning and continued his dirty work till well into the afternoon when the storm showed signs of letting up. Although the force of the wind subsided considerably, conditions still remained most unpleasant through the balance of the day. This was the situation that faced the Young People's Club on the day advertised for their entertainment and dance.

It was finally decided to cancel the dance, but to go ahead with the play for the townspeople, who loyally turned out in spite of the wretched weather conditions, and from all accounts thoroughly enjoyed the entertainment.

The young people taking part in the play were: Mrs. Arthur Johnson, Miss Beatrice Holt, Miss Josephine Bredsen, and Miss Peggy Monaghan. Mr. A. E. Carr, Mr. Karl Venn, and Mr. Olive Russell, and each member of the cast played their parts very effectively. Miss Beatrice Holt as the stuntsy "Sis Riggs" deserves special mention, and her two dance numbers in the third act won hearty applause. Miss Peggy Monaghan, as "The Girl in Red" in the third act, was very good, and her two song numbers made a great hit. Mrs. Arthur Johnson, as "Mrs. Berry," an Oklahoma widow, and Miss Josephine Bredsen as "A Sweet Young City Gal," both carried their parts well. Mr. Andy Carr as "Aaron Slick," lost his voice at times, but his actions were good and he filled a difficult role very creditably.

Mr. K. Venn, as "Merriod," a crooked speculator, and Mr. C. Russell, as "Clarence Green," a mysterious young man, whose real part in the play is not revealed till the end, each did well.

The Young People's Club are to be congratulated on the success of their first production of this nature.

The play will be repeated on Wednesday, May 18.

Gopher Destruction

"A gopher in time saves nine." Now is the zero hour to renew hostilities with the enemy.

If nothing is done to destroy gophers until after seeding the opportune moment will be past. The enemy will be vastly increased in numbers. Our most effective weapon, the poison, will not be nearly so effective for the reason that green food will be available and the gopher plagues himself whether he eats the poison or not. Before seeding time the food is scarce and the poison grain is gratefully accepted.

Many municipalities supply sufficient poison to cover the land once.

(At the Dominion experiment—Continued on page 8.)

M. D. of Cereal

The Council of the Municipal District of Cereal No. 242, met in the Municipal Office at Oyen, Alberta on Saturday April 16, 1927.

The members present were Reeve Gibson, Deputy Reeve J. E. Werry and councillors S. J. Caskey, F. W. Nichol and John Gripp.

The minutes of the council meeting of March 14 were read and adopted.

The correspondence was read and disposed of.

The council appointed A. L. Stevens, Chartered Accountant of Calgary as Auditor for 1927, at a salary of \$125.00.

Oyen Subdivision No. 3732 was declared by the council a hamlet.

By-law No. 50 being a by-law making places of business in the Municipal District liable to taxation was read a third time and passed, ordered signed, sealed and engrossed in the By-law Book.

The Council authorized the Secretary-Treasurer to levy for school purposes the mill rate set opposite each school district on the assessed value of the land, (including minerals and timber) improvements and businesses set out in the assessment roll and situate or carried in the school district to produce the amount of the estimated expenditure of the board of trustees of the school districts. Webster S.D. 6 mills; Bell Plains S.D. 8 mills; Pendleton S.D. 8 mills; Neilville 0 mills; stinson 16 mills; Lundberg 6 mills; Clarksdon 9 mills; North Excel 10 mills; Farming Valley 13 mills; Kewick 4 mills; Fairweather 11 mills; Kirkwall 10 mills; Springburn 20 mills; Kennal 12 mills; Greenmount 0 mills; Nebalia 18 mills; Abbott 18 mills; Superior 3 mills; Hills 7 mills; Superior 3 mills; By-law No. 51 being a by-law setting the price at which the

Men's and boy's better style sweaters, priced from \$3.25 to \$8.00.

Men's work shirts, overalls, combinations, work gloves, felt hats, fine shirts and dress shoes.

Men, see these new goods before making your spring purchases.

Ladies

R. H. Williams & Co., of Calgary, will be at this store on Tuesday, April 26, with a complete line of Ladies Ready to wear goods.

S. A. MILLER

lands acquired under the Tax Recovery shall be sold or leased for grazing or cutting hay was read a third time and passed, ordered signed and sealed and engrossed in the By-law Book.

The mill rate for municipal purposes was set by the council at 7 mills on the assessed valuation as set out in the assessment roll.

The council leased the N.W. 31 26 5 4, to E. L. Ketcheson for grazing for 1927 for the sum of \$15.00 cash.

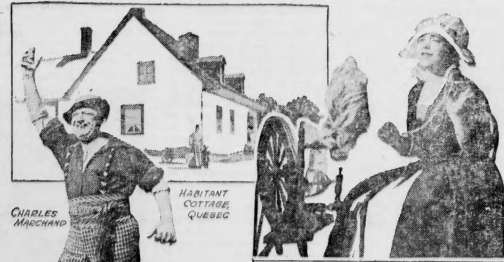

The school payments made by the Reeve and Secretary-Treasurer on March 31st as follows were approved: Hills S.D.

\$350.00; Superior 35.00; Superior 150.00; Abbott 350.00; Nebalia 180.00; Springburn 62.10; Fairweather 150.00; Kewick 50.00; Farming Valley 81.00; North Excel 162.50; Clarksdon 37.50; Lundberg 150.00; Stinson 181.25; Bell Plains 66.25; Webster 65.00; Kennal 325.00; Kirkwall 175.00; Greenmount 20.00.

The council approved of the following estimates for 1927, and authorized the Secretary to levy and collect a rate of 7 mills on the dollar valuation on all the rateable lands of the Municipal District for municipal purposes.

(Continued on page 8.)

First White Man's Music in Canada

A musical sensation on a scale never before attempted in the city of Quebec will be held at the Chateau Frontenac, from May 20 to 22. The Festival, which will combine folk-songs and handicraft indigenous to the Province of Quebec, is unique in character, since it is the first time a folk-song festival has been staged anywhere in America in its mature setting with handicraft. The National Museum of Canada, in co-operation with the Canadian Pacific Railway, is organizing this festival on a very comprehensive scale.

Among the artists who will interpret the folk-songs are J. Campbell McInnes, of Toronto, who has been principal soloist with the Philadelpia, Chicago and Cleveland orchestras, and Charles Marchand well-known "Chansonier" of Montreal, who has toured both Canada and the United States; also Dr. Ernest MacMillan, director of the Toronto Conservatory of Music; Dr. Healey Willan, Canadian composer and Oscar O'Brien of Montreal, who have composed harmonizations of melodies and arrangements for singing, especially for the Festival.

Choral renderings by various composers of some of the native folk-songs will be given by the Chantiers de Saint Dominique of Quebec, one of the most famous choirs in French Canada. The Bastille choir will sing a fully choral High Gregorian Mass on the morning of May 21. Outstanding among the women artists to take part are: Madam Juliette Gaultier de la Verendrye, Madame Dussane, who is an ardent lover of folk-song and an interpreter of the same in many languages, is a soprano of the Chicago Opera Association. She has toured the St. Lawrence, a descendant of the explorer, Pierre Gaultier de la Verendrye, sang in the Boston Opera before devoting herself to the study of folk-song. She has learned the St. Lawrence language in order to sing St. Lawrence folk-songs, and is also familiar with many Indian dialects.

A large number of leading musicians, folklore and handicraft enthusiasts from all parts of Canada and the United States will attend the Festival, which is regarded as the musical sensation of the year.

MAY APPOINT BRITISH ENVOY TO DOMINION

Ottawa.—Great Britain may appoint a representative to Canada to act in almost the same capacity to the minister who has been appointed to the United States. The way of the minister was stated in the House of Commons. The Prime Minister said that a British representative would probably be a high one in Canada.

Prender King's announcement came during his explanation of an item in the estimates of \$5,000 for a secretary to the prime minister. The premier stated that he wished this item voted for an executive secretary. Some misunderstanding had arisen over the term "secretary." He would like to see it voted for, that the prime minister was the only minister who had not a deputy minister. His only assistance was an opportunity of consultation with the prime minister's office. Premier King added, had not increased so that it was imperative in the public interest that it be organized as a business-like office similar to other departments.

Prender King referred to the appointment of a minister from the United States.

"I understand that in all probability Great Britain intends to appoint a representative to Canada in a similar capacity," Premier King said, "someone who will be in the position of a high commissioner in the Dominion and who will expect, perhaps, more in the way of an opportunity of consultation with the prime minister than with any other minister of the Crown."

Hon. Hugh Guthrie, Conservative leader, declared his view of the explanation given by the prime minister to be no serious objection to the item being approved. He said that he had not voted in the estimates, that it was a general impression that it was for a "glorified secretary."

To Purchase Legation Building

\$500,000 Voted for Canadian Legation at Washington

Ottawa.—For the purchase of a building for the Canadian legation at Washington \$500,000 was voted by the House of Commons after heated opposition. Hon. Hugh Guthrie, leader of the Conservative opposition, moved to amend the estimate to \$225,000, but on division the motion was lost by 51 to 90.

The Conservative leader argued that \$250,000 would be sufficient to secure adequate rented quarters for the legation quite as good as the newly-apportioned building in the United States to Canada would secure in Ottawa.

The prime minister, in supporting the appropriation, said that it would be more economical to purchase than to rent, and moreover, if Canada was to maintain her prestige among the nations of the world represented in Washington a proper, permanent building should be secured.

Soviets Would Help Cantonese

Moscow.—A Kharkov despatch says the Ukrainian Labor Union is being flooded with applications from workers who desire to be sent to China to help the Cantonese in their fight against the Northerners. A statement issued by the Union declares however that while the proletarians of the Soviet republic are always ready to support the Chinese toilers morally it is not considered men for such service.

World Should Be Reunited

Vancouver.—That the building of vessels by the Canadian Government Merchant Marine for the new service to be inaugurated between Canada and the West Indies "should be obtained proportionately between the Atlantic and Pacific shipyards" is the recommendation of the Vancouver board of trade and forwarded to Mr. Henry Thorne, president of the Government line.

Japan May Send More Ships

Tokyo.—Japan's intention to send more ships to China waters, was expected to be augmented soon by four more destroyers. Various commercial newspapers are urging the government to assume a further attitude toward China, but the government is insisting on maintaining its present attitude, although announcing that necessary may cause an alteration at any time.

W. N. C. 1477

Bank Messenger Robbed

With Police Close By Bandits Escape

Yamouli, N.Y.—Two armed bandits held up and robbed a messenger for the "Canton" at National Bank, in New York post office and escaped with about \$15,000 in cash.

McMahon had just stepped from an armored bank car under police guard and entered the building when the men forced him into the car at the door. Postmaster Frederick G. Newell's office took the bus of money he carried and speed of away in an automobile bearing an Ontario license.

When he jumped out of the armored car McMahon ran into the post office, Postmaster Angus McInnes, one of the three left the building and followed the bank messenger into the building. McMahon, followed with him at the door as he was running out to give the alarm.

McMahon ran out the door through which the bandits fled and fired two shots at the machine as they went from the curb. Neither hit the bandit car. It is believed.

U.S. Air Mail

May Permit Canadian Stamps to Be Used in Future

Washington, D.C.—Postage in Canadian stamps of the special fee of 10 cents for the United States air mail services will be arranged for Canadians, if there is any demand for the service.

Discussing informally the extension of the U.S. air mail service to Canada, Postmaster General New stated here that he saw no reason why Canada could not be given some consideration. Canada's air mail stamps could be used for the extra 10 cents postage on matter to be sent by air.

At present, the ordinary postage of two cents can be prepaid in Canadian stamps. It is necessary to buy United States stamps to prepay the extra 10 cents. It is understood that Canadian authorities have not asked for such an arrangement. No figure could be obtained here as to the number of letters being sent by people in Canada by the air mail route which now requires from one to two days in the United States and is said to save from one to two days on ordinary mail routes.

South African Flag Question

Basils of Slaves Believed to Have Been Found

Capetown, South Africa.—The Cape Town Government newspapers were the first to report the discovery of a boy's skull found in the ruins of a building between the government flag committee and representative flag committee as the basis of a solution of the flag question.

The opposition press, however, generally states the report as unreliable, and strongly recommends the withdrawal of the flag bill this session.

The conference adjourned until May 13, with independent representatives leaving to secure approval of the bill. The bill was not approved by the government—flag with the cross of St. George on a green background divided into quarters.

Start Anti-British Movement

Native Section of Shanghai May Declare Boycott

Shanghai.—A definite anti-British movement which may take the shape of a boycott similar to those recently declared at Canton and Hong Kong, was launched in the native section of Shanghai.

A great and British league was organized at a meeting attended by representatives of the Koumintang (Cantonese political party), the women's association, the Traders Union of the International Settlements, the "Telegraph Operators Union, students of the Shanghai University and others.

Canadian Takes Caruso's Place

New York.—Edward Johnson, of Guilford, Ont., is in Caruso's shoes, tonight, and the Canadian singer, hailed by John McCormack as the greatest tenor of the day, Mr. Johnson appeared as "Madama" in "Alibi" at the Metropolitan opera house wearing Caruso's costume—a gift from the lady as a tribute to the actor who has succeeded.

Parli-Agreement With Soviets

Paris.—The Soviet and French representatives have reached a partial accord on the question of the Russian debts to France. The Soviet government is willing to pay an average of 60,000,000 gold francs annually for 62 years.

Royal Competitors

At Ottawa Show

Prince of Wales and Spanish Prince

Are Seeking Exhibits

Ottawa.—Held to the throne of Great Britain and Spain will vie with each other at the world's poultry congress being held here from July 27 to August 4 of this year. H.R.H. the Prince of Wales recently announced his intention of exhibiting some live birds from his farm in Cornwall, England, and word has been received that H.R.H. the Prince of Asturias, heir to the Spanish throne, intended exhibiting some birds from his own poultry farm. The birds from the Spanish Crown Prince's farm will be the feature of the Spanish national exhibit.

Dr. Ernest Rhoads, regent secretary, received word from Prof. E. de la Torre, in charge of the royal poultry school at Aranya de Mar, Spain, that the Spanish national exhibit was being forwarded on May 15, and that the live birds exhibit would be sent via air mail on July 14. An exhibit is being held in Madrid on June 20 at which will be chosen the birds to represent Spain. In addition to those from the royal farm.

The Spanish government, which has taken three spaces at the congress exhibition, with a total postage of fifty feet to a depth of thirty feet, states that it is prepared to leave its exhibit in place for Central Canada exhibition. Twenty Canadian delegates are coming from Spain.

ALBERTA COAL QUESTION IS UP FOR DISCUSSION

Ottawa.—Stoward was expressed by Hon. Charles Stoward, Minister of Interior, during a debate in the House of Commons, that the Board of Railway Commissioners have the right of transporting Alberta coal to Ontario was not more than 27 a ton, but the rate could be put into effect immediately, by Order-in-Council, without waiting for another session of Parliament.

The Minister agreed that to enable Alberta coal to successfully compete with American coal in the markets of Ontario, a 57 ton rate was necessary, and intimated that if the board found the cost to be greater than that, the Government would be prepared to grant assistance in order to make the transportation of a million tons a year of Alberta lignite into Ontario economically feasible. The government would take the same view in this matter as it had in granting assistance to the Maritime provinces.

The question of unemployment in the coal industry in Alberta was brought up by J. J. Garland, C.E.A., Reg. Div.

Hon. Peter Heenan, Minister of Labor, said he had received several telegrams with respect to the situation in Alberta. He intimated that receipt of these communications, he had sent a man to the mining fields of that province in similar conditions when the Lady Williamson was entertained by members of the legislature.

Why Lambs Leave Home

Fifty-three mountain sheep left their native haunts at Banff recently, and were shipped by Canadian Pacific Express to their new home at Kamloops. The consignment, which was the result of a month's trapping operations carried on by the Royal Mounted Police wardens, was made at the request of the government of British Columbia and cost a small fee where the numbers of mountain sheep are depleted.

Visitors to who flock to the view on the Banff-Wilderness trail, who known as "Sheep Point" for the purpose of "snapping" Mr. and Mrs. Sheep, will notice that almost all of weekly finds has been found. As a matter of fact, the sheep have increased so rapidly, that the author

WAGE INCREASE IS SOUGHT BY C.N.R. EMPLOYEES

Montreal.—The board of conciliation, recently appointed to consider wage increases for more than 25,000 railway employees of the Canadian National Railway, convened here. The board is composed of W. J. Donovan, K.C., chairman, Winnipeg; Howard S. Ross, K.C., Montreal; representing the men, and Peter White, K.C., Toronto, acting for the railway.

Of the 25,000 men, 18,000 are employed in various classes of work, including office clerks, passenger train employees, stores and stationery employees, shippers and stationery employees and firemen. They are seeking a \$20 a month increase in pay for the month-ended men and 10 cents an hour for those working on hourly pay basis.

The remaining 7,000 employees are engine, sleeping and observation car employees. The class request a 12 per cent. increase and a uniform wage schedule. At present they are working on two different schedules, the result of various amalgamations effected by the National system in the past few years.

Protest From Alberta

Claim Immigrants Unfit for Farm Work Began Public Charge

Edmonton.—A protest against the dumping of Welsh and other European immigrants in Alberta cities and towns has been made by the Provincial Government. Acting Premier George Healey has wired Robert Forbes, minister of immigration, calling his attention to the fact that men are being brought here, ostensibly as farm workers, who are actually in the unskilled labor class and not fit for work on the farms.

With no provision made for them on their arrival here and with a scarcity of the sort of work they are able to do, they are in most cases thrown upon the public for support and it is this phase of the situation that the Government is protesting.

Provinces Not Included In Government Grant

Appropriation for Diamond Jubilee Celebration is for Ottawa

Edmonton.—If Alberta's part in a diamond jubilee celebration of Confederation it will have to be at its own expense, according to an Ottawa ruling just received by the province. The appropriation by the Federal parliament is to be spent in Ottawa only.

Edmonton is a member of the committee for the celebration of Confederation it will have to be at its own expense, according to an Ottawa ruling just received by the province. The appropriation by the Federal parliament is to be spent in Ottawa only.

Made Honorary Life Member

Vancouver.—Victor Williamson, government engineer, was made an honorary life member of the British Columbia Association of Engineers when the Lady Williamson was entertained by members of the legislature.

Problems Of Smuggling

U.S. Train Made Goods Finding Their Way Into Canada

Toronto, N. Y.—Sparks, chairman of the Commercial Protective Association, gave further evidence before the world customs commission, held here last week, that the United States had first with the importation of prison-made goods into Canada.

This created a most "sensitive" commission, but no adequate system of prevention had been established. Last week said Mr. Sparks, \$60,000, worth of prison-made goods had been produced in the penal institutions of the United States. As the labor organizations and other interested parties in the United States had been prevented from the sale of these goods in the United States open market, a proportion of them found their way from Canada. This had been proven thoroughly at Boston, John Quaker, said Mr. Sparks.

"What the preventive service needs is brains and not brawn," declared Mr. Sparks, this morning. To export men, he believed, would do little to solve the problem, as they would then be an army of untrained men.

The efforts of his organization were directed against petty smuggling, he said.

"But the man who, under cover of darkness, is a 'crackpot' in all is a criminal," he declared. The petty smuggler breaks the law, but his offense might be regarded in the future as a minor one, while that of the big commercial smuggler was a deliberate crime. The real secret was a jail sentence, not a fine, he said.

"What you recommend is right, swift, impartial enforcement of the law," interpreted Chief Commissioner Brown.

"Yes," said Mr. Sparks.

Supplementary Estimates

Grants for Maritime Provinces as Recommended by Duncan Report

Ottawa.—The supplementary estimates for 1927-28 were tabled in the House by Hon. J. A. Aikins. The estimates for the Maritime provinces are as follows: \$25,000 for the purchase of land, building equipment and furnishings for combined residence and offices for the Canadian legation at Washington, D.C.

A further grant of \$50,000 is made towards expenditures in connection with the World Jubilee congress to be held in Ottawa this summer. There is \$15,000 to provide for a trade mission of Alberta dignitaries to be made by rail and lake under the supervision of the Dominion Railways and the Canadian Pacific.

The total cost of the government is borne by other governmental, municipal and private organizations.

NEW PROBLEMS ARE NOW FACING THE CANTONESE

Shanghai.—Serious distress on the Yangtze has led to the outbreak of a new rebellion at Shanghai and elsewhere between moderates and radicals are problems now facing the Cantonese, who only a few weeks ago were hammering northward in a definite threat on taking note of the Northern government.

The factional controversy between the moderates and radicals in the Cantonese regime and the civil and radical wing, which has its seat at Hankow, resulting for many weeks into active conflict when plain clothes men, acting under direction of General Chiang Kai-shek, Cantonese generalissimo and leader of the radicals, raided the headquarters of the Cantonese and their allies in Shanghai, Hangchow, and other cities.

Fighting resulted and in Shanghai 12 persons were killed and many wounded in the various struggles. The radicals, armed with machine guns, pistols and bombs, attacked every known union center, in one case 550 laborers in a single hall. Similar raids were carried on in other cities, and it was feared that the fighting in the latter places.

Twenty Driven to Boat Escape

Tokyo.—More than 20 persons were driven near Fusan, Korea, when an overloaded ferry boat capsized, leaving 200 passengers on the beach. While a rescue party was still making, the authorities stated they believed the majority of the passengers were rescued.

No Agreement With Italy

Ottawa.—There is no agreement between the Italian and Canadian governments with regard to leaving Italian laborers in Canada. Hon. Robert Forster, minister of immigration, gave further evidence before a question from Hon. J. Woodsworth.

Errecting New Wireless Station

Edmonton.—Plans are being made to erect the most powerful broadcasting station in Canada, at Red Deer, Alberta, is announced by the Alberta Pacific Electric Company, which operates 200 gram elevators in Manitoba, Saskatchewan and Alberta.

BRITISH WOMEN MAY CONTROL LARGEST VOTE

London.—John Bull may be outvoted in the next general election by the women of his household.

This prospect was created by Premier Baldwin's announcement in the House of Commons that the government will introduce a bill at the next session of Parliament lowering the minimum voting age for women from 20 to 21 years. It is estimated that 2,000,000 women will be enfranchised under the measure and when the next general election comes around—normally late in 1928—there will be 12,500,000 British women able to vote, compared with about 11,000,000 men.

The momentous declaration was made with seeming hesitancy by the prime minister following discussion of the franchise question by the cabinet. It is a few years since the House of Commons has discussed the decision to lower the voting age for women.

The announcement immediately became the political sensation of the day. The Budget, introduced by Chancellor of the Exchequer, Mr. Churchill and the Government's much-discussed bill for repatriating war veterans, were forgotten in the House of Commons. The decision to lower the voting age for women was the balance of power in the hands of the women.

The announcement is hailed by outgroups as the final victory in a long campaign which started in 1907 only in the House of Commons and estimates of 60 years ago and placed a watershed final during the last two months with much lobbying by women men, talk, about 100,000 of their short skirt and votes in the process.

China Needs Powerful Leader

Or Struggle May Last For Years

Opinion of Shanghai Official

Shanghai.—Foreigners never fully regain the status they held in China before the present unrest, according to the opinion of a British national settlement at Shanghai. The present military struggle in China may continue for a number of years, according to another senior power leader, who said that the respect or fear of the Chinese people. The economic disturbance may not abate for many years.

With regard to the defense of the foreign settlements at Shanghai, the British government made the following remark:

"Had not the British strengthened the situation and sent large numbers of troops thousands of foreigners in Shanghai would have been massacred."

Plane for N.J. Work

Elizabeth, N.J.—L. F. A. Laurence, of the Canadian Air Force, is to be in charge of the first of six Fokker aeroplanes purchased by the Canadian Government for extensive survey work on Hudson Bay and Hudson Strait. The other five machines are to be delivered before June.

Miners Appeal For Relief

Ottawa.—An appeal from the miners of Leitchfield that the Government must come to the aid of the situation there as a result of the mines being closed, was read in the House of Commons by Hon. Hugh Guthrie, Conservative leader. No action was taken on it.

Twenty Driven to Boat Escape

Tokyo.—More than 20 persons were driven near Fusan, Korea, when an overloaded ferry boat capsized, leaving 200 passengers on the beach. While a rescue party was still making, the authorities stated they believed the majority of the passengers were rescued.

No Agreement With Italy

Ottawa.—There is no agreement between the Italian and Canadian governments with regard to leaving Italian laborers in Canada. Hon. Robert Forster, minister of immigration, gave further evidence before a question from Hon. J. Woodsworth.

Errecting New Wireless Station

Edmonton.—Plans are being made to erect the most powerful broadcasting station in Canada, at Red Deer, Alberta, is announced by the Alberta Pacific Electric Company, which operates 200 gram elevators in Manitoba, Saskatchewan and Alberta.

Canadian Forest Week

Forest Fires Have Consumed Half Canada's Timber Supply

Canada's national campaign to protect her forests from the scourge of fire has taken on crystallized form in the setting aside of a forest week each year in which a great educational campaign is carried on, looking toward the elimination of human carelessness as a factor in destroying Canada's forest resources. This year a proclamation of the Governor General fixed the week of April 24 to 30 as "Canadian Forest Week." The proclamation sets forth that Canada's forest resources is threatened with two great dangers, both of which are man-made and therefore preventable, the one of individual carelessness in destruction of the timber, young growth and even the very soil which produces it, by fire, and the other, the use of wasteful and destructive cutting methods without any concept of ensuring a new crop. Through the medium of the press, the press and the radio it is hoped that all Canadians may be alerted and encouraged to do their part in promoting the conservation of this valuable resource.

Just how great is Canada's forest resources is indicated by some recent figures prepared by the Director of Forestry. The capital invested in the forestry industry of Canada approximates \$250,000,000, nearly nine times as much as the lumber and saw mills, the balance in pulp and paper operations. The pulp and paper industry contributes over \$100,000,000 and is increasing rapidly \$125,000,000 to the monetary sum of Canada's annual production. The pulp and paper industry is the largest of the forest products of the Dominion is about \$100,000,000 annually.

Over 2,500 saw-mills engage in lumber, pulp and paper manufacture. The annual cost of lumber approximately 1,000,000,000, the value of the lumber produced is about \$1,000,000,000. While producing much less than the United States, Canada has surpassed her neighbor in the value of her forest products. The pulp and paper trade, from \$10 to 15 million cords of pulpwood are produced annually. This forestry of Canada is favored in its manufacture in Canada; much a large part being further converted into paper and other wood products.

According to the Natural Resources Intelligence Service of the Department of the Interior, the forest has been burned as is now available to maintain these industries and over four times as much has been destroyed as has been used in the wood-consuming industries. In other words, fifty per cent of Canada's forest has already been destroyed by fire. It behooves every responsible citizen therefore to face the facts and to his share to stop their reckless acts or at least to bring them down to as low a proportion as has been attained in other countries.

The Douglas Fir

Only Representative of Its Kind Found in Canada

The Douglas fir (Pseudotsuga taxifolia) of British Columbia, and the Pacific coast, often erroneously called "Oregon plan" is the only representative of its genus in Canada. It probably yields more lumber annually than any other single species in America. The tree in Canada is not found east of the Rocky mountains, the greater part of the lumber being produced in the coastal region of British Columbia. This is Canada's largest tree, and from it larger structural timbers can be produced than from any other tree in Canada. It is used chiefly for structural purposes, but on account of its attractive appearance it is also used for interior finish. The wood is also important in Canada as a material for railway ties and mining timbers. It is noted chiefly for its strength and durability and the large dimensions in which it can be obtained.

Saskatchewan Oil Wells

During the fiscal year ended April 30th, 1925, over 100,000 acres of land in various parts of Saskatchewan have been leased under the Petroleum and Gas Regulations. Since then a large acreage has been placed under lease in the Lloydminster district, where wells are being drilled in great oil.

Looking for Trouble

Lots—"Hobart and these flowers this morning—why are you looking at them so closely, dear?"
Ladies—"Just looking to see if there are any seeds in them."
Lads—"What do you mean?"
Ladies—"Oh, nothing. Only he gave them to me yesterday morning, and I threw them in the ash can."

W. N. U. 1677

Neglecting the Three 'R's'

Question Whether Student of Today is Really Well Equipped

A high school inspector of the Province of Ontario has expressed the opinion that only one out of five students may be said to be a good writer. That is a serious criticism, coming as it does from one in a position to speak with authority. With all the boasted advances that have been made today in the science of education and pedagogy, it is open to serious question whether the student who has matriculated is better equipped mentally than the student of a generation or two ago who left public school with a sound knowledge of what were recognized as the fundamentals of a good education—reading, writing and arithmetic. The idea of laying the foundation of all education in a thorough grounding in the three "R's" is not popular among educationalists today, and the effects of the present system are becoming painfully apparent. The discipline of the old days was stern, the rudimentary instruction thorough. It meant drudgery to master those three subjects, but the way they should be mastered. Today it seems that drudgery is the one thing that children and young people are being taught to avoid.—Toronto Globe.

Successful Year for the Swine Industry

Smaller Volume, But Higher Average Price Is Obtained

The farmers of Canada did well with their swine in 1925. According to the Live Stock Market and Meat Trade Review just issued by the Dominion Department of Agriculture, they could, however, have done a good deal better as the supply during the year did not equal the demand and a much larger quantity of pork products could have been sold at a good profit.

The output of hogs sold at stockyards and packing plants under federal grading amounted to 2,754,200 head as compared with 2,853,400 in 1924. However, while supplies were smaller in volume than in 1924, there was a higher average price per hundred and also a higher value per head. Following the usual seasonal price improvement in 1925 when the value of hogs was about \$7 per head higher than in 1924, this further increase was all the more encouraging.

Average Length of Life

Will Not Exceed 70 Years Says Co-Discoverer of Insulin

Human beings may look forward to an average life of 70 years in the opinion of Dr. John James Richard Marched, of Toronto, Nobel prize winner for medicine in 1923 for his discovery of insulin. "I don't think that the average length of life will ever be 100 years," he said. "The human machine wears out just like a mechanical engine. By combining health and we have lengthened the average life almost three decades, and the day is coming when every man and woman can confidently look forward to living 70 years."

Try and Get It

Another interesting problem which was originated by Richard Henry Little.

Deposit \$50 in your bank, and make the following withdrawals:
First, 125, leaving bal. of \$10
Second, 815, leaving bal. of \$10
Third, 89, leaving bal. of 6
Fourth, 86, leaving bal. of 0

Try and get the extra dollar!

Placer Mining in B.C.

In a recent address at Smithers, Mr. Douglas Jay, resident engineer for the British Columbia Department of Mines, referred to the success of the Cedar Creek Mining Company last year. This company is working placers in the Carleton district and last year encountered rich pockets of nuggets, running in size from that of a pea to the largest nugget weighing 10 ounces. Many had been found as large as an egg, Mr. Jay said.

Homeostated Entries

Homeostated entries for the first two months of 1925 total 629, as compared with 557 for the same period of 1924. Materially more in 1925, compared with 54; Saskatchewan's 336, against 296; Alberta's, 213, against 206, and British Columbia's 9, against 8.

Today was tomorrow yesterday, but today is today, just yesterday was today yesterday, but today is today, and tomorrow will be today tomorrow, which makes today yesterday and tomorrow all at once.

Be sure you're right—but don't be too sure that everybody else is wrong.

Importance Of The Navy

Canada Should Provide A Force Sufficient To Protect Her Ports

"Canada of to-day, and from her own resources, cannot provide all the protection necessary for her commerce, nor is there any need for her to do so," said Rear Admiral W. O. Story, C.M.B.E. (retired), in addressing an Empire Club luncheon at Toronto on the importance of the navy in the life of the Empire.

"Canada is one of the greatest nations forming the British Empire. We are all one family, and are, or ought to be, each other's best customers. By combining and forming one navy, we will insure that the sea shall be kept open to our commerce at all times and under all conditions. I would suggest that it is not outside the means of Canada to provide a force sufficient to protect her ports of ingress or egress, and her share of the additional revenue required to increase the adequate war policy the trade routes of the Empire. I would suggest that it is not outside the means of Canada to provide a force sufficient to protect her ports of ingress or egress, and her share of the additional revenue required to increase the adequate war policy the trade routes of the Empire. I would suggest that it is not outside the means of Canada to provide a force sufficient to protect her ports of ingress or egress, and her share of the additional revenue required to increase the adequate war policy the trade routes of the Empire."

Buttermilk for Hens

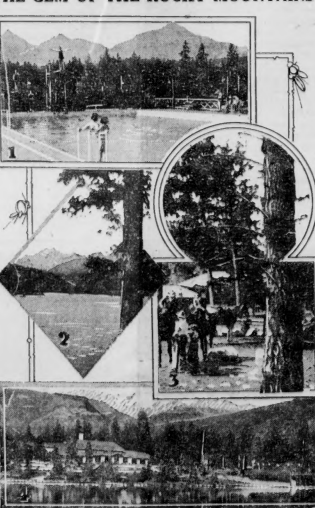

The Effect of Buttermilk on the Hatchability of Eggs

The hatchability of eggs from hen fed buttermilk proved to be considerably higher than that of eggs from hens fed molasses in an experiment conducted at the Alford, Manitoba, Experimental Station. Two pens of barred Rocks were used in the test, their pens received equal feed and mash, one pen was given buttermilk in the wet mash and to drink while the other pen was fed molasses in the mash as well as in the hoppers. Eighty-six eggs from each pen were set. Those from the buttermilk pen produced 66 chicks while those from the molasses pen produced only 42.

Best Trees for Prairies

Tests made at the Forests Service station at Regina, Saskatchewan, by the Department of the Interior, show that hardy conifers such as spruce, lodgepole pine, jack pine, Scotch pine, and larch are particularly suited for planting and thrive under adverse conditions. These trees are now widely planted throughout the prairie provinces.

THE GEM OF THE ROCKY MOUNTAINS

Nature designed Jasper to be a playground of unrivaled beauty and man has added nature by placing in the heart of the park a most attractive summer resort. Jasper Park Lodge has passed its years of infancy and can now rightly claim to be one of the outstanding summer resorts of the world. Its fame has attracted the elite and increasing numbers tourists from all points of the compass are coming to spend their holidays at Jasper.

The Lodge which is located beside Lac Beauvert, on the lap of the Athabasca Valley, with great mountain ranges on four sides, nests into its surroundings as if it too had been planned by nature. Yet it has all the comforts which are to be expected in a modern hotel and all at the opportunity for rest and recreation which are looked for in the up-to-date summer resort.

Photograph No. 1 shows a section of the spectacular hotel swimming pool at Jasper Park Lodge. Photograph No. 2 is a glimpse of Mount Edith Cavell as seen from the shores of Lac Beauvert in front of the Lodge. Photograph No. 3 shows a group of tourists preparing to leave the Lodge for a glacier along the lake. Photograph No. 4 shows a portion of Jasper Park Lodge with Lac Beauvert in the foreground and the Collins Range behind.

Demand for Hogs

Canadian Pork Products on the British Market Negligible Quantity

The quality of the Canadian pork products offered on the British market in 1925 showed steady improvement, yet according to the annual Live Stock Market and Meat Trade Review of the Dominion Department of Agriculture, supply was often inadequate in volume to meet the demand. Quite often during the year supplies from the overseas market were negligible in relation to supplies from other countries as to greatly affect the status of our product. At the same time demand was marketing very heavy supplies and some other European countries more than doubled their offerings of the previous years and found a generally ready market.

In 1924 Canada sold to Britain 99,125,000 pounds of bacon as compared with 120,507,700 pounds in 1925. There was also a considerable decrease in the sale of hams to Britain. It is pointed out in the Review that Canada's reduced exports were entirely due to the shortage in supply, hence being largely above an export basis. If the pig crop had been larger its products would still have found a ready market.

The lack of volume of our export to Britain is jeopardizing our position on that market, especially since some European countries, such as Latvia, Poland, Holland and Sweden, new comers in the bacon market are rapidly gaining a foothold there. Economic production in larger volume is absolutely necessary if Canada's pork products are to remain a factor in the life's market.

Life's Three Periods

Few Have Time, Money, and Inclination All At Once

F. H. Bedford retiring as Vice-President of the Standard Oil Company of New Jersey, recalls the saying that a successful man's life has three periods, in the first of which he has time but no money, in the second money but no time, and in the third money and time—but no inclination. Over in Hungary an elderly peasant, who had been a successful farmer, was asked to explain the saying. He replied that in his youth he had time but no money, in his middle years he had money but no time, and in his old age he had time and money but no inclination.

A man trained for vagrancy naturally has a pinched look.

Daymen Should Not Depend On Guess Work

Testing and Weighing Only Plan for Successful Returns

It is time that cows producing only 120 pounds of fat a year were weaned as so-called milk in pails for the cream to rise. Take the guess work out of dairymen by weighing and testing the milk. Then feed a suitable ration according to production and wean out the boards. The result will be an increase as the low producers are removed and the good cows fed better.

If clean milk is to be marketed the cows must be kept clean. Dirt and straw in the milk are a sign of carelessness. Caring for the food value of milk and the fact that it is taken in the raw state, every care should be exercised to keep stables, cows, milk, milkers and utensils sanitary.

The man who refuses to weigh and test the milk or to join a co-operative association is usually the man who is continually complaining about the unprofitableness of keeping cows. Increased production means increased returns.

How to Produce Clean Milk

Contamination of Milk Is Nearly Always Controllable

Milk is one of the most important and valuable of food products. It is fresh and clean, and its purity depends almost altogether on the producer. In fact ninety-nine per cent of the milk consumed in this country is produced by the producer himself. If he will take the trouble to understand what his sources are and if he is willing to exercise ordinary sanitary precautions, he can produce clean milk.

A new pamphlet on producing clean milk, issued by the Dominion Department of Agriculture, contains a series of instructions on the different ways in which milk is spoiled and gives clear instructions on how to avoid common sources of contamination. It emphasizes the fact that clean milk may be produced under the simplest conditions and with but common sense and cleanliness. It provides proper care is taken, while even the most modern facilities a producer may develop greatly contribute to his success. His methods of handling are essential.

Hydro Electric Energy

The complete statistics compiled annually for many years by the Water Power Survey of the Department of the Interior show that over a million horsepower of hydro-electric energy has been developed in Canada during the past two years. This was distributed amongst the provinces thus: Ontario, 327,000; Quebec, 600,000; Manitoba, 182,000; British Columbia, 65,000; Nova Scotia, 12,000.

Radio Upsets Timepieces

London Hotel Had to Install Electrical Controlling Arrangement

The influence of a nearby radio station on the clocks of the Savoy hotel, London, has cost one man his job. Ever since the British Broadcasting Company, which has 24 stations, established its headquarters next door to the hotel, one of the clock in that hotel has shown a tendency to gain.

Consequently the hotel has been equipped with an electrical arrangement for controlling all its clocks, and Bill Jenny, whose job for years has been to wind all the clocks in the hotel, is no longer needed there. He has been retired on a pension of £100 a year.

French-Canadians Return

From July, 1925, to April, 1926, a total of 33,293 French-Canadians returned to Canada from the United States, and in the period of April, 1926, to January, 1927, 50,935 expatriated children to Quebec Province returned from across the border, mainly from New England, to re-establish Canadian homes, according to the Hon. J. E. P. Perrault, Minister of Colonization, Mines and Fisheries in Quebec.

Rapid Exchange of Messages

Messages have been exchanged between London and Australia by the Marconi wireless beam system, and replies received within 20 minutes. It was the first time that the Marconi believes that before another year it will be possible similarly to telephone by the system.

Northern Manitoba M.P.

N. A. Timmins, Esq., and Hollinger Consolidated have taken an option on copper claims in the Lake of the Northern Manitoba, and will do considerable diamond drilling this summer. H. M. Whistler, M.E., will have charge of the work.

Mr. and Mrs. S. A. Miller, left Oyen yesterday to spend a few days in Calgary.

Mr. Jack Aylesworth left yesterday for Calgary, to sit for an examination.

About Town and Country

The Ladies Altar Society of the Sacred Heart Church will hold a whist drive and social, in the Masonic Hall, Oyen, on Thursday, April 28.

Under instructions from Mr. H. F. Kidd, I will sell at public auction, at his farm on S.W. 1/4, 22 20 4 (nine miles south of Oyen) his farm stock and equipment, on Wednesday, April 27. Sale to commence at 1 p.m.—B. H. Dial, Auctioneer.

Dr. T. F. Holt, dentist, will be leaving Oyen about May 15, and expects to be away about three months. Anyone requiring dental work should see Dr. Holt at an early date.

Under instructions from Mr. C. W. Halstead, I will sell at public auction, the farmstock, machinery, etc., at his farm on the west half of Sec. 3, Twp. 27, Rge. 5, W. 4, (1 mile south of Springburn School), on Friday, April 22. Lunch served. Sale to commence at 1 p.m. Mr. B. H. Dial, Auctioneer.

Cornelius Pauls was admitted to hospital on Sunday, suffering from advanced Diabetes.

Miss Glenell Colwell left last Thursday for Calgary.

Mrs. W. E. Lannon and child, returned to Oyen last Thursday from Drumheller, where they have been spending the winter.

In connection with the service at the United Church next Sunday evening, Mr. Corcoran will show a series of slides on "Trinidad, the Land of the Humming Bird."

Mrs. George Balam and son, left this morning for Calgary.

Gopher Destruction

(Continued from page 1.)
at Station at Scott the following home prepared mixture is used with excellent success.

Method of Preparation
Dissolve four ounces of strychnine in three quarts of water to which add one quart of vinegar. Keep warm on the back of the cook stove for twelve hours then add enough water to bring the solution back to one gallon. Mix this with 50 pounds of wheat.

Use a wash tub to mix the poison with the grain in order that none of the liquid will leak away. Stir well at least three times during the first twenty-four hours and keep covered to prevent drying out before using. If liquid remains in the bottom of the tub after frequent stirring, a handful of shorts may be stirred in to take up this moisture. Place only a small spoonful at each hole on a bright warm day when the gophers are active.

Mr. Clive Ruddell, left yesterday for Kyle, Sask., where he will be on the staff of the Bank of Toronto. Mr. Ruddell came to Oyen about 14 months ago. During his stay in Oyen, he made many friends, and his departure this week is a matter of sincere regret to those who knew him.

Mildred Good of Excel, has made satisfactory progress since her operation and will be leaving the hospital the latter part of this week.

Mrs. Harry Rhys, Mrs. J. Crowley, and Mrs. A. Arneson, were discharged from hospital last Saturday.

Miss I. Stewart, a former teacher of Oyen School staff, was a weekend visitor in Oyen, when she was the guest of Mrs. A. C. Robinson.

The Oyen Ladies Curling Club, will hold a whist drive and old time dance, on Thursday, May 12.

M. D. of Cereal

(Continued from page 1.)

Salary, Secretary-Treasurer, \$1800.00; Salary, Auditor, \$250.00; Supervision of Roads, \$50.00; Council meetings, \$75.00; Office expenses, \$600.00; Labor, \$213.20; Machinery and repairs, \$800.00; Destruction of weeds and pests, \$800.00; Grants, \$250.00; Mothers allowance, \$290.00; Pounds expense, \$100.00; Election expenses, \$50.00; Insurance, \$60.00; Workmen Compensation Board, \$75.00; Registration, \$400.00; Relief, \$200.00; Health, \$200.00; Material, \$300.00; Convention expense, \$100.00.

The council accepted the offer of Thos. Storrar, to buy the S.E. 21 27 5 4.

The council agreed to lease the N.W. 32 28 4 4, to Jess Williams for hay, for 1927, for \$8.00. The S.E. 1 28 4 4 to E. Pope, for grazing, for 15.00. The S.E. 15 25 4 4, to D. Patterson, for grazing, for 15.00.

The Secretary was instructed to cancel the taxes levied against the S.E. 23 20 4 4, for 1925 1926, same being S.S.B. lands and not subject to taxation.

The financial statement for the month of March 1927 was accepted.

The offer of Carl Neilson to buy the S.E. 7 27 4 4, was accepted.

The council decided to give two packages of gopher poison per quarter and subject to an order from the councillor of the division to pay two dollars per quarter section for poison ingested gophers on vacant lands adjoining crops.

Mr. S. J. Caskey was appointed a committee to look after the five cots turned over to the Municipal District.

The council adjourned to meet again on Saturday, May 14, at 1 p.m.

J. P. Rorabeck, Sec.-Treas.

CANADIAN NATIONAL EUROPEAN TOURS

A maximum of travel through particularly interesting countries at a minimum of expense is provided in the Canadian National Educational Tours this summer through Scotland, England, France, Belgium, Switzerland and Italy.

Two tours have been arranged and sailing will be made from Montreal, July 8, on the S.S. "Andania," direct to Glasgow. Very careful attention has been given to itineraries involved.

Tour No. 1 is a 37-day trip on sea and land, visiting important cities in Scotland, England, France, Belgium, Switzerland, and Great Britain and the Continent and return to Montreal. Tour No. 2 is a 51 day trip on sea and land, visiting in Scotland, England, France, Belgium, Switzerland and Italy. All expenses, \$501.00, Montreal to Great Britain and the Continent and return to Montreal.

There will be no excursion fares to the seaboard from points in the Prairie Provinces. These tours will be personally conducted from Western Canada, and while overseas will be under the direct care and supervision of thoroughly responsible and reliable organization, fully qualified in every particular to successfully look after the interests of our patrons.

The sight-seeing program is very complete and generous. Motor coaches and automobiles are freely used. All sight-seeing is well planned to save unnecessary fatigue and to see the worth while places within the time at our disposal. Competent lecturers will reveal to our patrons the outstanding features, literary, historic, artistic or scenic of the Old World centres visited.

Mr. M. G. Whitlock, local agent for the Canadian National Railways, will be glad to discuss these tours and arrange all details.

LEGAL NOTICE

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by The Land Titles Act, under a certain mortgage which will be produced at the time of the sale, there will be offered for sale by public auction in the Post Office in the Village of Oyen in Province of Alberta on Saturday the 7th day of May 1927, at the hour of 2 o'clock in the afternoon, the following property, namely:

All of Section 28 in Township 25 and Range 2, West of the Fourth Meridian in Alberta, excepting thereout all that portion of the South Half of said Section taken for right-of-way of the Canadian National Railway Company as said right-of-way is shown on a plan thereof filed in the Land Titles Office for the South Alberta Land Registration District, as L.W. 118, such excepted portion containing 12.00 acres more or less, reserving to the Crown all mines and minerals.

Terms of sale to be Twenty per cent cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save a lease at one-third of the crop, terminable by notice between 1st January and 1st March next, and taxes for the current year.

The vendor is informed that the above property is situated within one mile from Acadia Valley on the C.N.R. and that there are situated thereon a dwelling house 10 ft. by 28 ft., 2 1/2 shabs 20 ft. by 24 ft. and 14 ft. by 10 ft., and a hen house 8 ft. by 14 ft., also 2 wells, and that about 145 acres are under cultivation.

For further particulars and conditions of sale, apply to Thomas Lees, Oyen, Alberta.

Dated this 8th day of April, A.D. 1927.

Approved: W. Forbes, Registrar.
